To Whom It May Concern.

Mr. Alexey Petrushin has been providing Software Engineering (UI Engineering) services as an independent contractor for Qubell, Inc. since March 2012 until July 2014.

Mr. Petrushin was leading the design and development of the rich user interface based on the modern technology stack. His work is still the foundation of our user interface today, in part because of Mr. Petrushin's attention to maintainability — everything he develops is accompanied by excellent documentation, comprehensive automated tests and sophisticated mocks of external systems.

I would definitely recommend Mr. Petrushin as a senior technical specialist to any company for which user interface is a strategic differentiator.

Please do not hesitate to contact me directly if you have further questions or concerns.

Sincerely yours,

A handwritten signature in blue ink, appearing to read "Stan Klimoff".
